

Wappblaster Official Whatsapp Api Integration

Aoxio Saas Multi Business Service Booking Software

Watch Video Here:

Drive:

https://drive.google.com/file/d/1w4D4SIW_ugKpRKIKrueOhDqGT40P6nQZ/view?usp=sharing

Youtube: <https://youtu.be/eAPSEd3SaZY>

Step1- Register To <https://app.wappblaster.com/>

Step2- Connect Official Whatsapp Number In Channel:

<https://app.wappblaster.com/products/crm/channel>

For This Process If You Need Help In Meta Verification Just Messages To Wappblaster Team, Will Help On Anydesk, Google Meet Or Zoom.

Step3- For Aoxio Software We Need To Get Template Approval From Meta Which Will Take Some Minutes.

Sample Template:

1. appointment booking confirmation message: Here {{1}}= Customer Name, {{2}}=Your Service Name,{{3}}=Date & {{4}}= Time.

Hello {{1}}

Your Appointment For BarbarShop –

Service {{2}}, booking is confirmed at {{3}} & {{4}}.

Please Reach On Time.

2. appointment booking approve message:

Hello {{1}}

Your Appointment For BarbarShop

Service {{2}}, booking is approved for {{3}} at {{4}}.

Please Book Again.

Thanks

3. appointment booking reject: Here {{1}}=Name, {{2}}=Service Name

Hello {{1}}

Your Appointment For BarbarShop

Service {{2}}, booking is rejected.

Please Book Again.

Thanks

4. appointment booking reminder: {{1}}= Name, {{2}}= Reminder Time Like 90 Min Remaining, 60 Min etc, {{3}}= Service Name,{{4}}= Date,{{5}}=Time

Hello {{1}} A Gentle Reminder For Your Appointment In {{2}}. Your Appointment For BarbarShop Service {{3}}, booking is approved for {{4}} at {{5}}.

Please Book Again.

After All Template

Step 4-

Now Copy Below Url And Make Clone With Right Corner Button:

<https://app.wappblaster.com/products/automation/flow/113efd474812e06acaf2efca47dec65e>

Once Clone Created.

A. Custom Webhook – Give Any Webhook Title And Generate Webhook

It Will be Like:

<https://webhooks.wappblaster.com/webhook/6705ef00ce8ee84248d15081>

Just Copy Last Code: 6705ef00ce8ee84248d15081

And Paste In Your Aoxio Setting.

B. Map 2. Send Template Message V2- Select Your Channel And Your Template.

Run And Save After Each Template Mapping.

Done Your Api Connected.
